EXPERTS LIVE  
SUMMER NIGHT

# Agenda

What is JIT

What is JEA

Demo - JEA Configuration

Demo - JEA Administrative Endpoints

Wrap up & Questions

EXPERTS LIVE  
SUMMER NIGHT

# What is JIT

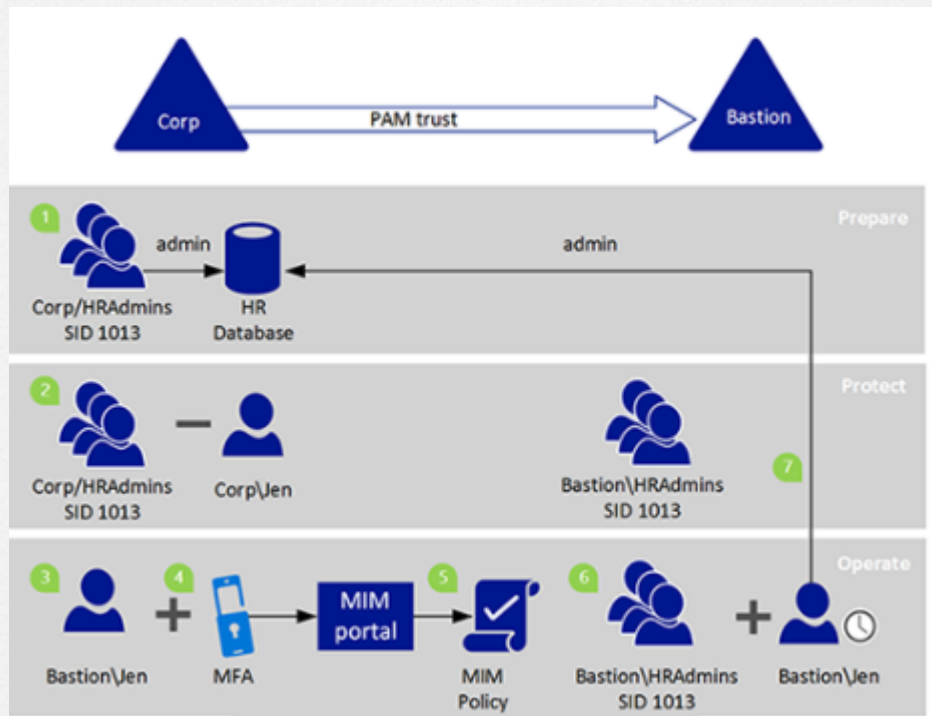

Privileged Access Management (PAM)

Requirements:

- External forest
- Microsoft Identity Management
- 2012R2 Domain Functional Level
- Azure AD Premium

# PAM Architecture

EXPERTS LIVE  
SUMMER NIGHT

# What is JEA

Just Enough Administration

Secure PowerShell access to critical systems

Reduce the number of Administrators

Extensive logging of Administrator activity

# Implementing JEA

Deploy and configure pre-requisites

- WMF 5.1
- Enable PowerShell remoting
- Configure PowerShell logging

PowerShell cmdlets to generate configurations

# JEA Components

- Role Capabilities .psrc
  - Configures capabilities
- Session Configurations .pssc
  - Determines user mapping to roles
- Language modes

EXPERTS LIVE  
SUMMER NIGHT

# Demo

Create JEA Configuration

EXPERTS LIVE  
SUMMER NIGHT

# Demo summary

Create a Role Capability File

Deploy Role Capability File

Create Configuration File

Register Configuration

Update Role Capability

EXPERTS LIVE  
SUMMER NIGHT

# Demo

Create JEA AD Management configuration

EXPERTS LIVE  
SUMMER NIGHT

# Demo summary

Create configuration for AD management

Validated security of the configuration

Show the logging capabilities

EXPERTS LIVE  
SUMMER NIGHT

# Wrap up

JIT can and should co-exist with current AD

JEA has extensive features

Enable PowerShell logging

More possibilities for automation
